

CSS Text Styles

Types of CSS Text Styles:

1. **color:** Sets the text color.

```
color: red;
```

2. **font-family:** Specifies the font of the text.

```
font-family: Arial, sans-serif;
```

3. **font-size:** Defines the size of the text.

```
font-size: 16px;
```

4. **font-weight:** Controls the boldness of the text.

```
font-weight: bold;
```

5. **font-style:** Sets the style of the font (normal, italic, or oblique).

```
font-style: italic;
```

6. **text-align:** Aligns text horizontally (left, right, center, justify).

```
text-align: center;
```

7. **text-decoration:** Adds decoration like underline, overline, line-through.

```
text-decoration: underline;
```

8. **letter-spacing:** Adjusts the space between characters.

```
letter-spacing: 2px;
```

9. **line-height:** Sets the space between lines of text.

```
line-height: 1.5;
```

10. **text-transform:** Controls text capitalization (uppercase, lowercase, capitalize).

```
text-transform: uppercase;
```

11. **word-spacing:** Adjusts the space between words.

```
word-spacing: 5px;
```

These properties can be combined to create a wide variety of text styles in your CSS.
